

# Cavalor Product Spotlight

## Calm

Calm for a long period

- Ideal for young horses and stallions.
- A reinforcing effect in combination with Cavalor Destress.

**Packaging:** Pail 5 kg & 800 g

**How to use:** Per day: 25 g

## Take it Easy

Calms quickly and powerfully

- Paste to reduce competition stress.
- Easy to use.

**Packaging:** Bottle 300 ml

**How to use:** Depending on the degree of stress, 30 ml to 90 ml 24 hours before the stress situation. For example: 30 ml the evening before, 30 ml in the morning and 30 ml before riding.

## Muscooler

Gel for tendons & muscles

- Ideal after heavy work.
- Relieves painful muscles and tendons.
- Reduces swelling of the legs.

**Packaging:** Bottle 500 ml – 3000 ml

**How to use:** Depends on the situation. Massage the gel onto the legs and/or back in thin layers. Can be used under rest bandages

## Destress

Treat stress preventively

- Ideal for hot and nervous horses.
- Works preventively a few days before the competition.

**Packaging:** Jar 100 g & 500 g

**How to use:** 15 g per day, start 2 days before the day on which the horse must be calm

### REMARK

There is no universal solution for nervousness, every horse reacts differently. We therefore recommend that you start with the combination of Cavalor Take It Easy & Cavalor Destress.

## Cooling Wash

Refreshes the body

- Gives the horse the necessary cooling after heavy work.
- Works as a light disinfectant for small wounds, for example on the legs.
- The horse dries faster.

**Packaging:** Bottle 500 ml

**How to use:** Mix the content of 1 cap (15 ml) with 4 l of cold water. Apply this mixture with a sponge to the body and the legs. Can be rinsed off, but this is not necessary
